

Sound system for Simultaneous translation- interpretation

Idiomas y
Eventos
LTDA.

We use a compact sound system for simultaneous translations. Receiver headphones are wireless, and many of them use rechargeable lithium batteries that last up to 9 hours.

Unlimited amount of wireless receivers.

Wireless microphones (different types: lap, handheld, gooseneck, etc.).

Up to 300 meters transmission distance.

2.4 GHz international free frequency.

83 independent channels to work at the same location.
